INDEX TO VOLUME 5, 1948

Subjects dealt with under various headings in the JOURNAL are set out both in the main Index and under their respective headings—for example 'Abstracts,' 'Book Reviews.' Names of authors of original articles are included in the Index. There is a separate Index to Abstracts. Names of authors of articles abstracted are separately listed.

Original Articles are indicated by the letter (O); Abstracts by the letter (A); and Book Reviews and British and Foreign Official Publications by the letter (R).

		Pages			Pages
No. 1.	January	1–50	No. 3.	July	107–174
No. 2.	April	51–106	No. 4.	October	175–244

A

Adrenal cortex and stressful activity, 222 (A)
Aëdes ægypti, control in British Guiana, D.D.T. and, 104 (A)
———— control in absence of piped water supply, 229 (A)
———— feeding on rabbits receiving "gammexane," 229 (A)
Aerosols, device for sampling, 102 (A)
African coal miners, physiological observations on (W. S. S. LADELL), 16 (O)
Age and wastage in industrial populations, 171 (A)
AHLMARK, AXEL: Poisoning by methyl mercury compounds, 117 (O)
Air, disinfecting, in premises where food is manufactured, 103 (A)
Air-borne particulates, penetration through the human nose, 102 (A)
Aircraft workers, occupational dermatoses in, 46 (A)
Alcohol and capacity for work, 223 (A)
Alkyldinitrophenols, toxicology of, 221 (A)
Alkyl polyphosphates, physiological effects, 167 (A)
Altitude, oxygen and blood in work at, 222 (A)
Aluminium, lung changes associated with manufacture of, 44 (A)
———— experimental lung changes due to, 225 (A)
———— dissolution of particles, by pulmonary phagocytes, 170 (A)
Alzo granite quarries, silicosis in workmen in, 100 (A)
Ammonia, toxicity to mice, 219 (A)
Amphetamine sulphate, effect on normal and fatigued subjects, 97 (A)
Anæmia, anti-pernicious, in lead poisoning, 96 (A)
Aniline in animal tissue, 95 (A)
Arc welders in steel ship construction, health of, 216 (R)
Arsenic, studies in the incidence of cancer in a factory handling inorganic compounds of—I. Mortality experience in the factory (A. BRADFORD HILL and E. LEWIS FANING); II. Clinical and environmental investigations (K. PERRY, R. G. BOWLER, H. M. BUCKELL, H. A. DRUETT, and R. S. F. SCHILLING), 1 (O)
Arsenical intoxications, BAL in, 163 (A)
———— keratitis, 33 (A)
Arsine poisoning, 33 (A)
Asbestosis, 44 (A)
————, in Quebec, 100 (A)
Association of Industrial Medical Officers: Nottingham group, 50; Forty-ninth meeting, 105; Tees-side group, 106; London group, 106; North-western group, 106; Fiftieth meeting, 172; London group, 173; Scottish group, 173; Nottingham group, 174; South Wales and West group, 174; Tees-side group, 174; Fifty-first meeting, 231; London group, 232; Birmingham group, 232; North-western group, 234; Nottingham group, 234; Tees-side group, 235; Scottish group, 235
Atmospheres, breathing in irrespirable, 93 (R)
Atmospheric samples, lead and zinc in, 29 (A)
Atomic energy in industry and medicine, 31 (A)
Audiometers, hearing aids and, 94 (R)
Aviation, high-altitude, investigations, 97 (A)

B

Backache, chronic structural low, 93 (R)
Bagasse, of lungs, 224 (A)
———— pathogenicity of, 170 (A)
BAL, in arsenical intoxications, 163 (A)
—— for exposure to tellurium, 35 (A)
—— liver injury in the dog after exposure to, 217 (A)
BAL, skin sensitization to, 226 (A)
Bauxite workers' lung, 170 (A)
Bedding, oil treatment of, 223 (A)
BENATT, A. J. (and T. R. B. COURTNEY); Uræmia in methyl bromide poisoning, 21 (O)
Benzene poisoning, 34 (A)
Benzine vapour, and carbon monoxide, problem of combined action, 95 (A)
Benzol poisoning, acute gastritis due to, 34 (A)
———— vitamin C content of tissues after, 95 (A)
Beryllium compounds, pneumonitis in workers exposed to, 35, 99, 225 (A)
Beverages, dangers of cadmium-plated receptacles for, 96 (A)
Binocular vision in miners, 228 (A)
Blood constituents etc. after isocaloric meals of varying carbohydrate content, 41 (A)
Boils and infected hands; an epidemiological investigation (G. P. B. Whitwell and Ian Sutherland), 88 (O)
Book Reviews;
Advanced industrial first aid, 1947 (TREVETHICK, R. A.), 27
Diseases of the joints and rheumatism (STONE, K.), 27;
Proceedings of a Conference on Industrial Ophthalmology, 92
Chronic structural low backache (ROBERTS, R. A.), 93
Treatise on silicosis hazard of rocks etc. in German mines (LANDWEHR, W.), 93
Breathing in irrespirable atmospheres (DAVIS, SIR ROBERT H.), 93
Psychology in industry (MAIER, NORMAN R. F.), 93
Psychology, the fundamentals of human adjustment (MUNN, NORMAN L.), 161
Natural history of disease (RYLE, JOHN A.), 161
Principles of medical statistics (HILL, A. BRADFORD), 161
Introduction to medical statistics (WOODS, H. M., and RUSSELL, W. T.), 162
Practice of industrial medicine (T. A. LLOYD DAVIES), 213
Tuberculosis in young adults (MARC DANIELS and others), 213
Safety rules for use in chemical works; Part I—model rules (Association of British Chemical Manufacturers), 214
Physiology of man in the desert (E. F. ADOLPH and others), 214
Demonstrations of physical signs in clinical surgery (HAMILTON BAILEY), 214
Catalogue of medical films, 214
BOWLER, R. G. (and others); Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Brain abscess, metallic foreign bodies in, 226 (A)
Brass foundries, controlling a lead hazard in, 29, 220 (A)
———— exposure to metallic fumes and dust in, 31 (A)
Breathing in irrespirable atmospheres, 93 (R)
British and Foreign Official Publications:
Study of individual children's diets (WIDDOWSON, E. M.), 28
Incidence of neurosis among factory workers (FRASER, R., and others), 28
Hearing aids and audiometers, report of Committee on Electro-acoustics, 94
Medical Research in War (M.R.C. Report), 215
Affections of the respiratory tract in individuals exposed to cotton dust (U.S. Public Health Bulletin), 216
Health of arc welders in steel ship construction (U.S. Public Health Bulletin), 216
British Guiana, *Aëdes ægypti* control in, 104 (A)
British tradition in industrial health (E. R. A. MEREWETHER), 175 (O)

Bromide, in blood, urine, and brain, 219 (A)
Brooklyn, chlorine accident in, 225 (A)
BUCKELL, H. M. (and others); Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Burnt coal-gas, sensitivity to, 45 (A)

C

Cadmium poisoning by inhalation, 30, 163, 164 (A)
——— workmen exposed to, 221 (A)
——— oxide particles in lung tissue, microscopic determination of, 45 (A)
Cadmium-plated receptacles for preservation of food and beverages, dangers of, 96 (A)
Calcium carbonate, influence on settling silica dust, 102 (A)
Cancer in a factory handling inorganic compounds of arsenic.—I. Mortality experience in the factory (A. BRADFORD HILL and E. LEWIS FANING); II. Clinical and environmental investigations (K. PERRY, R. G. BOWLER, H. M. BUCKELL, H. A. DRUETT, and R. S. F. SCHILLING), 1 (O)
——— of the lung, asbestosis and, 100 (A)
——— of skin from pitch and tar, 37 (A)
——— social and occupational factors, 50 (A)
Carbitol, 166 (A)
——— acute toxicity and general systemic actions of, 39 (A)
Carbohydrate content, isocaloric meals of low and high, 41 (A)
Carbon dioxide, effects on man of high concentrations of, 222 (A)
——— ——— poisoning, chronic, 219 (A)
Carbon disulphide poisoning in rayon staple fibre plants in Poland, 218 (A)
Carbon monoxide and benzine vapour, problem of combined action of, 95 (A)
——— ——— in hot rooms in machine construction plant, 171 (A)
——— tetrachloride, colorimetric determination of, 38 (A)
——— ——— duodenal ulcer from exposure to, 38 (A)
——— ——— poisoning, report of a case, 95 (A)
Carcinogenic activities of coal tar, 226 (A)
Cardiovascular changes in kitchen workers, 41 (A)
Ceylon, health of plumbago workers in (W. L. P. DASSANAYAKE), 141 (O)
Chemical works, safety rules for, 214 (R)
Children's diets, a study of individual, 28 (R)
Chlorine accident in Brooklyn, 225 (A)
Choline esterase activity of serum, effect of under-nutrition on, 223 (A)
Chromate dermatitis, 46 (A)
Chromic acid mist, plastic chips in control of, 167 (A)
Clothing for work in tropical heat, 47 (A)
Coal miners, 49 (A)
——— hæmatological and humoral changes in silicotic, 44 (A)
——— physiological observations on West African (W. S. S. LADELL), 16 (O)
——— pneumoconiosis of (ALICE STEWART and others), 120 (O)
——— pneumoconiosis in, in Wales, 170 (A)
Coal mines, dispnœa of effort in workers in, 101 (A)
Coal tar, carcinogenic constituents of, 226 (A)
——— ——— in dermatology, 226 (A)
Compressed air, surgical emphysema due to, 46 (A)
——— ——— disease, skeletal changes in, 96 (A)
Copper fever, 31 (A)
Cotton dust, affections of the respiratory tract in individuals exposed to, 216 (R)
COURTNEY, T. R. B. (and A. J. BENATT); Uræmia in methyl bromide poisoning, 21 (O)
Creatinine losses in sweat during work in hot humid environments, 98 (A)
CRUICKSHANK, C. N. D.: Evaluation of skin cleansers and protective creams for workmen exposed to mineral oil, 204 (O)
Cryolite as detoxifying agent for lead arsenate, 40 (A)
Cutting tools, "dead hand" from electrically driven, 42 (A)

D

Dark adaptation and miners' nystagmus, 227 (A)
DASSANAYAKE, W. L. P.: Health of plumbago workers in Ceylon, 141 (O)
DAVIES, IDRIS (and others): Pneumoconiosis of coal-miners, 120 (O)
D.D.T. and *Aedes ægypti* control in British Guiana, 104 (A)
——— insecticidal activities of, etc., 47, 48 (A)
——— in oil as mosquito larvicide, 104 (A)
——— surface deposits on mud, 229 (A)
"Dead hand" from electrically driven cutting tools, 42 (A)
Decompression sickness, treatment of, 168 (A)
Dermatology, coal tar in, 226 (A)
Dermatoses, occupational, in aircraft workers, 46 (A)
Desert, physiology of man in the, 214 (R)
Diatomaceous earth silicosis (ENRICO C. VIGLIANI and GIACOMO MOTTURA), 148 (O)
Dichlorethane poisoning, 37 (A)
Diets, a study of individual children's, 28 (R)
Digital foreign bodies in spot-welders, 46 (A)
Disabled Persons (Employment) Act, 1944; some medical implications (W. TAYLOR), 107 (O)
Disease, natural history of, 161 (R)
Diving, problems of shallow-water, 41 (A)
DOWSETT, LYNETTE (and others): Pneumoconiosis of coal-miners, 120 (O)
DRUETT, H. A. (and others); Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Dry battery manufacture, mercury exposure in, 220 (A)
Dry cleaning of clothes, hygienic drawbacks of trichlorethylene in, 40 (A)
Duodenal ulcer following exposure to carbon tetrachloride, 38 (A)
Dust, electrostatic precipitation of industrial, 47 (A)
(and see under specific types of dust)
—— sampling in a hæmatite mine with the P.R.U. hand pump (H. H. WATSON), 198 (O)
Dye workers, papilloma of renal pelvis in, 166 (A)
Dynamite, headaches arising from contact with, 36 (A)

E

Effort, dyspnœa of, in underground workers in coal mines, 101 (A)
Electrical accidents, thermal injuries due to, 46 (A)
Electrically driven cutting tools, "dead hand" from, 42 (A)
Electro-acoustics, report of Committee on, 94 (R)
Electrocardiogram in silicosis, 44 (A)
Electrostatic precipitation of industrial dust, fumes, and vapours for hygienic purposes, 47 (A)
——— precipitator, improvement of, 171 (A)
ELLIS, F. P.: Victuals and ventilation and the health and efficiency of seamen, 187 (O)
Emphysema, surgical, due to compressed air, 46 (A)
Environment and fatal heat stroke, 47 (A)
——— of tuberculous patients in Lanarkshire, 99 (A)
Ethylene imine, acute toxicity to small animals, 219 (A)
Eye hazards in Wearside shipyards (A. KEFALAS), 51 (O)
—— hazards and safety practice; a review of 14,722 eye accidents in the Wearside shipyards (A. KEFALAS), 51 (O)
—— injury due to sulphur dioxide, 226, 227 (A)
—— —— due to quinone vapours, 37, 38 (A)

F

Factory workers, neurosis among, 28 (R)
Fainting and flying, 168 (A)
FANING, E. LEWIS (and A. BRADFORD HILL): Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Fatigue, effect of amphetamine sulphate on, 97 (A)
——— ocular, 98 (A)
FERGUSON, T.: Scottish essays in industrial health, 180 (O)
Fibrosis in the lungs of a silver finisher (H. E. HARDING), 70 (O)
First-aid, advanced industrial, 27 (R)
Flight personnel, physiological characteristics of, 222 (A)
Floors, oil treatment of, 223 (A)
Food and beverages, dangers of cadmium-plated receptacles for, 96 (A)
——, disinfecting air in places of manufacture, 103 (A)
Foreign bodies, digital, in spot-welders, 46 (A)
——— ——— metallic, in brain abscess, 226 (A)
Foundry workers, nodulations in, 170 (A)
Fruit, control of infected, 102 (A)
Fumes, electrostatic precipitation of industrial, 47 (A)

G

Gammexane, *Aëdes ægypti* and, 229 (A)
——— for malaria control in Sierra Leone, 104 (A)
Gas workers, injuries in, 103 (A)
German mines, silicosis hazards of, 93 (R)
Glass-blowers, respiratory function of, 42 (A)
Glass fibre, industrial disease due to filaments of, 102 (A)
—— industry, silicosis in, 169 (A)
Granite quarries, silicosis in workers in, 100 (A)
Granular basophilia during exposure to lead poisoning, 30 (A)

H

Hæmatite mine, dust sampling in, with the P.R.U. hand pump (H. H. WATSON), 198 (O)
Halogenated organic vapours in air, determination of, 39 (A)
Hands, boils and infected: an epidemiological investigation (G. P. B. WHITWELL and IAN SUTHERLAND), 88 (O)
HARDING, H. E.: Fibrosis in the lungs of a silver finisher, 70 (O)
——— Toxicology of zircon, 75 (O)
Headache from contact with dynamite, 36 (A)
Hearing aids and audiometers, 94 (R)

Heat, clothing for work in tropical, 47 (A)
—— creatinine losses in sweat in, 98 (A)
——salt tablets for use in, 97 (A)
—— stroke, environment and fatal, 47 (A)
High-altitude flight, investigations in, 97 (A)
High-tension current accidents with muscle injuries and myoglobinuria, 46 (A)
HILL, A. BRADFORD (and E. LEWIS FANING): Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Human adjustment, fundamentals of, 161 (R)
Hydrocarbons, determination in blood, 166 (A)

I

Industrial health, British tradition in (E. R. A. MEREWETHER), 175 (O)
———— —— Scottish essays in (T. FERGUSON), 180 (O)
———— medicine, practice of, 213 (R)
———— toxicology laboratory, range-finding test in, 217 (A)
Infected hands, boils and (G. P. B. WHITWELL and IAN SUTHERLAND), 88 (O)
Influenza, immunization against, 49, 103 (A)
Injuries, in gas workers, 103 (A)
Insecticides, 47, 48 (A)
Irrespirable atmospheres, breathing in, 93 (R)
Isocaloric meals of varying carbohydrate content, work, performance, etc. after, 41 (A)

J

Joints, diseases of, and rheumatism, 27 (R)

K

KEFALAS, A.: Eye hazards and safety practice: a review of 14,722 eye accidents in the Wearside shipyards, 51 (O)
Kitchen workers, cardiovascular changes in, 41 (A)
Kleinhungen gas works, injuries in, 103 (A)

L

LADELL, W. S. S.: Physiological observations on West African coal miners, 16 (O)
Lanarkshire, survey of tuberculosis in, 98, 99 (A)
Lead absorption and poisoning, hæmatological changes in, 30 (A)
—— arsenate, cryolite as detoxifying agent for, 40 (A)
—— content of street dirts in New York, 29 (A)
—— determination in atmospheric samples, 29 (A)
——, exposure to, 30 (A)
——, exposure to, in storage battery manufacture, 166 (A)
—— hazard in brass foundries, control of, 29, 220 (A)
—— in urine, 220 (A)
—— poisoning, anti-pernicious anæmia factor in, 96 (A)
—— ———— granular basophilia in, 30 (A)
—— ———— and production of agglutinins in relation to recent knowledge of *S. typhi* antigens, 96 (A)
" Lethane " insecticide, fatal poisoning, 40 (A)
Lettuce, control of infected, 102 (A)
Lewisite, disturbance of function induced by, 33 (A)
Lung, asbestosis and cancer of, 100 (A)
—— bauxite workers', 170 (A)
—— changes associated with manufacture of alumina abrasives, 44 (A)
—— nodulation in, in foundry grinders, 170 (A)
—— Portland cement dust and, 99 (A)
—— retention of quartz dust, 100 (A)
—— tissue, microscopic detection of cadmium oxide particles in, 45 (A)
Lungs of a silver finisher, fibrosis in (H. E. HARDING), 70 (O)

M

Machine construction plant, carbon monoxide in, 171 (A)
Malaria control by " gammexane," 104 (A)
Manganese dioxide as antidote to mercury, 165 (A)
m-Dinitrobenzene poisoning, 34 (A)
Medical films, catalogue of, 214 (R)
———— research in war, 215 (R)
Mercurialism, neurological observations on chronic industrial, 39 (A)
Mercury exposures in dry battery manufacture, 220 (A)
————, manganese dioxide as antidote to, 165 (A)
MEREWETHER, E. R. A.: British tradition in industrial health, 175 (O)
Methæmoglobinæmia, treatment with ascorbic acid, 96 (A)
Methanol poisoning, 218 (A)
Methyl alcohol poisoning treated with pectins, 35 (A)
———— bromide poisoning, uræmia in (A. J. BENATT and T. R. B. COURTNEY), 21 (O)
———— chloride, toxicity of, 40 (A)
———— mercury compounds, poisoning by (AXEL AHLMARK), 117 (O)
Microscopic detection of cadmium oxide particles in, 45 (A)
Milkers' hands, physiopathology of, 41 (A)
Mill workers, pathology of, 45 (A)
Mineral oil, evalution of skin cleansers and protective creams for workmen exposed to (C. N. D. CRUICKSHANK), 204 (O)
Miners' nystagmus, 227, 228 (A)
Mines, silicosis hazards of German, 93 (R)
Mono-chloro-mono-bromo-methane, toxicity and narcotic action of, 220 (A)
Morbidity, studies in occupational (IAN SUTHERLAND and G. P. B. WHITWELL), 77 (O)
MORRELL, F. H. (and others): Pneumoconiosis of coal-miners, 120 (O)
Mosquitoes, D.D.T. for, 48, 104 (A)
MOTTURA, GIACOMO (and ENRICO C. VIGLIANI); Diatomaceous earth silicosis, 148 (O)

N

Natural history of disease, 161 (R)
Nephritis in textile workers, 167 (A)
Neurosis among factory workers, 28 (R)
New York, lead content of street dirts in, 29 (A)
Nickel poisoning, 165, 221 (A)
Nitric acid gas poisoning, 39 (A)
2-Nitropropane, toxicity of, 95 (A)
Nitroso-methyl urethane, toxic effects of (F. WRIGLEY), 26 (O)
Nose, penetration of air-borne particulates through the human, 102 (A)
Nutritional state and miners' nystagmus, 227 (A)

O

Obituary, THOMAS GWYNNE MAITLAND, 236
Occupational morbidity, studies in (IAN SUTHERLAND and G. P. B. WHITWELL), 77 (O)
Ocular tasks, transfer of decrement in, 98 (A)
Oil treatment of floors and bedding, 223 (A)
Onion dehydrating plant, survey of, 36 (A)
Ophthalmology, industrial, proceedings of conference on, 92 (R)
Oxygen poisoning in man, 97 (A)
——— pressures, effects on man of carbon dioxide at various, 222 (A)

P

Papilloma of renal pelvis in dye workers, 166 (A)
Para-aminobenzoic acid, sunburn-protecting effect of, 226 (A)
Pectins, methyl alcohol poisoning treated with, 35 (A)
PERRY, KENNETH (and others): Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Phosgene poisoning, hæmodynamics in, 35 (A)
———— ———— studies on experimental, 218 (A)
————: pulmonary changes following exposure to, 225 (A)
Phosphate and metabolism of working and resting subjects, 223 (A)
PIERCE, J. W. (and others): Pneumoconiosis of coal-miners, 120 (O)
Pilots, fainting in, 168 (A)
Piperonyl butoxide, as insecticide, 48 (A)
Pitch, skin cancer from, 37 (A)
Plastic chips in control of chromic acid mist, 167 (A)
Plumbago workers in Ceylon, health of (W. L. P. DASSANAYAKE), 141 (O)
Pneumoconiosis, architectural characteristics of, studied by plastic models, 43 (A)
————————of coal-miners (ALICE STEWART and others), 120 (O)
———————— in coal workers in Wales, 170 (A)
———————— histological basis for reticulation of, 100 (A)
———————— Research Unit (P.R.U.) hand pump, dust sampling in a hæmatite mine with (H. H. WATSON), 198 (O)
Pneumonia, lobar, Portland cement dust and, 99 (A)
———————— in shipyard workers, 42, 43 (A)
Pneumonitis, chemical, from beryllium compounds, 35, 99, 225 (A)
Poland, carbon disulphide poisoning in rayon staple fibre plants in, 218 (A)
Portland cement dust, effect on lungs, 99 (A)
Premature labour, influence of profession on, 230 (A)
Protective creams and skin cleansers for workmen exposed to mineral oil, evaluation of (C. N. D. CRUICKSHANK), 204 (O)
Psychiatric aspect of miners' nystagmus, 228 (A)
Psychology, the fundamentals of human adjustment, 161 (R)
———————— in industry, 93 (R)
Pulmonary tuberculosis (see under tuberculosis)
Pyridine in air, estimation of, 166 (A)
Pyridoxine hydrochloride for radiation sickness, 32 (A)

Q

Quartz, lung retention of dust, 100 (A)
——— silicosis in a quartz mine, 224 (A)
Quebec, asbestosis in, 100 (A)
Quinone vapours, corneal and conjunctival injuries from, 37, 38 (A)

R

Radiation sickness, treatment of, 32 (A)
Radioactive emanations, 32 (A)
Radium dial painting, 33 (A)
Rats, sodium fluoracetate against, 48 (A)
Rayon staple fibre plants in Poland, carbon disulphide poisoning in, 218 (A)

Respiratory exchange etc. after isocaloric meals of varying carbohydrate content, 41 (A)
——— functions of glass-blowers, 42 (A)
Respiratory-tract infections, control in industry, 49 (A)
——— in individuals exposed to cotton dust, 216 (R)
——— oil treatment of floors and bedding in control of, 223 (A)
Rheumatism, diseases of the joints and, 27 (R)

S

Salmonella typhi antigens, lead poisoning and, 96 (A)
Salt tablet for use in hot environments, 97 (A)
SCHILLING, R. S. F. (and others): Studies in the incidence of cancer in a factory handling inorganic compounds of arsenic, 1 (O)
Scotland, tuberculosis in Lanarkshire, 98, 99 (A)
Scottish essays in industrial health (T. FERGUSON), 180 (O)
Seamen, victuals and ventilation and the health and efficiency of (F. P. ELLIS), 187 (O)
Selenium poisoning, 165 (A)
Shallow-water diving, problems of, 41 (A)
Shipyard workers, pneumonia in, 42, 43 (A)
——— ——— eye hazards in (A. KEFALAS), 51 (O)
Sierra Leone, "gammexane" for malaria control in, 104 (A)
Silica, conversion of, during ignition, possible source of error in analysis of powdered samples, 43 (A)
——— dust, 101, 102 (A)
Silicosis, pulmonary vascular lesions in, 169 (A)
——— appraising exposure, 101 (A)
——— diagnosis of, 169 (A)
——— diatomaceous earth (ENRICO VIGLIANI and GIACOMO MOTTURA), 148 (O)
——— experimental study, 224 (A)
——— electrocardiogram in, 44 (A)
——— in glass industry, 169 (A)
——— hazard in German mines, 93 (R)
———, hæmatological observations in, 44 (A)
——— lesions in workers removed from dust, 224 (A)
——— in a quartz mine, 224 (A)
——— solubility theory of, 168 (A)
——— in workmen in Alzo granite quarries, 100 (A)
Silicotic coal miners, hæmatological and humoral changes, 44 (A)
Silver finisher, fibrosis in lungs of a (H. E. HARDING), 70 (O)
Skin cancer from pitch and tar, 37 (A)
——— ———, social and occupational factors in ætiology of, 50 (A)
——— cleansers and protective creams for workmen exposed to mineral oil, evaluation of (C. N. D. CRUICKSHANK), 204 (O)
——— sensitization to BAL, 226 (A)
Small-pox, vaccination against, 49 (A)
Smoke and public health, 171 (A)
Social factors, influence on incidence of extrapulmonary tuberculous infection, 99 (A)
Sodium fluoracetate against rats, 48 (A)
——— nitrate poisoning, 40 (A)
Solvent vapours, sensory response to, 35 (A)
Spot-welders, digital foreign bodies in, 46 (A)
Statistics, introduction to medical, 162 (R)
——— principles of medical, 161 (R)
Steel industry, vitamin supplement administered to workers in, 103 (A)
Steel ship construction, health of arc welders in, 216 (R)
STEWART, ALICE (and others), Pneumoconiosis of coal miners, 120 (O)
Storage battery manufacture, control of lead exposure in, 166 (A)
Street dirts in New York, lead content of, 29 (A)
Stressful activities, human adrenal cortex and, 222 (A)
Sulphur dioxide, eye injury due to, 226, 227 (A)
Sunburn-protecting effect of *para*-aminobenzoic acid, 226 (A)
Surgery, physical signs in clinical, 214 (R)
Surgical emphysema due to compressed air, 46 (A)
SUTHERLAND, IAN (and G. P. B. WHITWELL): Boils and infected hands: an epidemiological investigation, 88 (O)
——— (and G. P. B. WHITWELL); Studies in occupational morbidity, 77 (O)
Swineherd's disease, observations on, 230 (A)

T

Talc mining, dust hazard in tremolite, 101 (A)
Tar, skin cancer from, 37 (A)
TAYLOR, W.: Disabled Persons (Employment) Act, 1944: some medical implications, 107 (O)
Tellurium, effect of ascorbic acid on tellurium breath, 219 (A)
——— exposure and treatment with BAL, 35 (A)
——— toxicity of ingested, 219 (A)
Tetraethyl lead, mass poisoning by, 221 (A)
Tetranitromethane, toxic effects of, 33 (A)
Textile workers, nephritis in, 167 (A)
Thermal injuries due to electrical accidents, 46 (A)
Thymoxyethyldiethylamine, treatment of phosgene poisoning with, 218 (A)
Tobacco industry, health hazards of, 230 (A)
Trasentine etc. for radiation sickness, 32 (A)
Trichlorethylene in dry cleaning of clothes, hygienic drawbacks of, 40 (A)
Tropics, clothing for work in, 47 (A)
Tuberculosis, asbestosis and pulmonary, 100 (A)
——— in young adults, 213 (R)
——— survey in Lanarkshire, 98, 99 (A)

U

Ultra-violet irradiation to disinfect air in food-manufacturing premises, 103 (A)
Under-nutrition, effect on choline esterase activity of serum, 223 (A)
Uræmia in methyl bromide poisoning (A. J. BENATT and T. R. B. COURTNEY), 21 (O)

V

Vaccination, influenza, in an industrial plant, 49 (A)
——— smallpox, of industrial workers, 49 (A)
Vapour, electrostatic precipitation of industrial, 47 (A)
———samples in air, methods of obtaining, 167 (A)
Varnishers, industrial pathology in, 38, 96 (A)
Vegetables, control of infected, 102 (A)
Victuals and ventilation and the health and efficiency of seamen (F. P. ELLIS), 187 (O)
VIGLIANI, ENRICO C. (and GIACOMO MOTTURA): Diatomaceous earth silicosis, 148 (O)
Visual reaction-time as a function of variations in the stimulus-figure, 98 (A)
Vitamin B_6 for radiation sickness, 32 (A)
——— C, for methæmoglobinæmia, 96 (A)
——— C content of tissues of experimental animals after benzol poisoning, 95 (A)
——— C and tellurium, 219 (A)
——— supplement, effect of administering, in the steel industry, 103 (A)
Volatile hydrides, 37 (A)

W

Wales, pneumoconiosis in coal-miners in, 170 (A)
War, medical research in, 215 (R)
WATSON, H. H.: Dust sampling in a hæmatite mine with the P.R.U. hand pump, 198 (O)
Wearside shipyards, review of 14,722 eye accidents in (A. KEFALAS), 51 (O)
Welders, pneumonia in shipyard workers, with special reference to, 42 (A)
West African coal miners, physiological observations on (W. S. S. LADELL), 16 (O)
Welders, arc, health of, in steel ship construction, 216 (R)
WHITWELL, G. P. B. (and IAN SUTHERLAND): Boils and infected hands: an epidemiological investigation, 88 (O)
——— ——— Studies in occupational morbidity, 77 (O)
Work performance etc., alcohol etc. and, 223 (A)
——— ——— after isocaloric meals of low and high carbohydrate content, 41 (A)
——— ——— phosphate administration and, 223 (A)
WRIGLEY, F.; Toxic effects of nitroso-methyl urethane, 26 (O)

X

X-rays, professional injury due to, 226 (A)

Z

Zinc determination in atmospheric samples, 29 (A)
Zircon, toxicology of (H. E. HARDING), 75 (O)

INDEX TO ABSTRACTS

A

Adrenal cortex and stressful activity, 222
Aëdes ægypti, control in British Guiana, D.D.T. and, 104
——— ——— control in absence of piped water supply, 229
——— ——— feeding on rabbits receiving "gammexane," 229
Age and wastage in industrial populations, 171
Air, disinfecting, in premises where food is manufactured, 103
Air-borne particulates, penetration through the human nose, 102
Aircraft workers, occupational dermatoses in, 46
Alcohol and capacity for work, 223
Alkyldinitrophenols, toxicology of, 221

Alkyl polyphosphates, physiological effects, 167
Altitude, oxygen and blood in work at, 222
Aluminium, lung changes associated with manufacture of, 44
Aluminium, lung changes associated with manufacture of, 44
———— experimental lung changes due to, 225
———— dissolution of particles by pulmonary phagocytes, 170
Alzo granite quarries, silicosis in workers in, 100
Ammonia, toxicity to mice, 219
Amphetamine sulphate, effect on normal and fatigued subjects, 97
Anæmia, anti-pernicious, in lead poisoning, 96
Aniline in animal tissue, 95
Arsenical intoxications, BAL in, 163
———— keratitis, 33
Arsine poisoning, 33
Asbestosis, 44
———— in Quebec, 100
Atmospheric samples, lead and zinc in, 29
Atomic energy in industry and medicine, 31
Aviation, high-altitude, investigations, 97

B

Bagasse, of lungs, 224
———— pathogenicity of, 170
BAL, in arsenical intoxications, 163
—— for exposure to tellurium, 35
—— liver injury in the dog after exposure to, 217
—— skin sensitization to, 226
Bauxite workers' lung, 170
Bedding, oil treatment of, 223
Benzene poisoning, 34
Benzine vapour, and carbon monoxide, problem of combined action, 95
Benzol poisoning, acute gastritis due to, 34
—— ———— vitamin C content of tissues after, 95
Beryllium compounds, pneumonitis in workers exposed to, 35, 99, 225
Beverages, dangers of cadmium-plated receptacles for, 96
Binocular vision in miners, 228
Blood constituents etc. after isocaloric meals of varying carbohydrate content, 41
Brain abscess, metallic foreign bodies in, 226
Brass foundries, controlling a lead hazard in, 29, 220
—— ———— exposure to metallic fumes and dust in, 31
British Guiana, *Aëdes ægypti* control in, 104
Bromide in blood, urine, and brain, 219
Brooklyn, chlorine accident in, 225
Burnt coal-gas, sensitivity to, 45

C

Cadmium poisoning by inhalation, 30, 163, 164
———— workmen exposed to, 221
———— oxide particles in lung tissue, microscopic determination of, 45
Cadmium-plated receptacles for preservation of food and beverages, dangers of, 96
Calcium carbonate, influence on settling silica dust, 102
Cancer of the lung, asbestosis and, 100
———— of skin from pitch and tar, 37
———— ———— social and occupational factors, 50
Carbitol, 166
———— acute toxicity and general systemic actions of, 39
Carbohydrate content, isocaloric meals of low and high, 41
Carbon dioxide, effects on man of high concentrations of, 222
———— ———— poisoning, chronic, 219
———— disulphide poisoning in rayon staple fibre plants in Poland, 218
———— monoxide and benzine vapour, problem of combined action of, 95
———— ———— in hot rooms in machine construction plant, 171
———— tetrachloride, colorimetric determination of, 38
———— ———— duodenal ulcer from exposure to, 38
———— ———— poisoning, report of a case, 95
Carcinogenic activities of coal tar, 226
Cardiovascular changes in kitchen workers, 41
Chlorine accident in Brooklyn, 225
Choline esterase activity of serum, effect of under-nutrition on, 223
Chromate dermatitis, 46
Chromic acid mist, plastic chips in control of, 167
Clothing for work in tropical heat, 47
Coal miners, 49
———— hæmatological and humoral changes in silicotic, 44
———— pneumoconiosis in, in Wales, 170
Coal mines, dyspnœa of effort in workers in, 101
Coal tar, carcinogenic constituents of, 226
—— —— in dermatology, 226
Compressed air, surgical emphysema due to, 46
———— disease, skeletal changes in, 96
Copper fever, 31
Creatinine losses in sweat during work in hot humid environments, 98
Cryolite as detoxifying agent for lead arsenate, 40
Cutting tools, " dead hand " from electrically driven, 42

D

Dark adaptation and miners' nystagmus, 227
D.D.T. and *Aëdes ægypti* control in British Guiana, 104
———— insecticidal activities of, etc., 47, 48
———— in oil as mosquito larvicide, 104
———— surface deposits on mud, 229
" Dead hand " from electrically driven cutting tools, 42
Decompression sickness, treatment of, 168
Dermatology, coal tar in, 226
Dermatoses, occupational, in aircraft workers, 46
Dichlorethane poisoning, 37
Digital foreign bodies in spot-welders, 46
Diving, problems of shallow-water, 41
Dry battery manufacture, mercury exposure in, 220
Dry cleaning of clothes, hygienic drawbacks of trichlorethylene in, 40
Duodenal ulcer following exposure to carbon tetrachloride, 38
Dust, electrostatic precipitation of industrial, 47
(and see under specific types of dust)
Dye workers, papilloma of renal pelvis in, 166
Dynamite, headaches arising from contact with, 36

E

Effort, dyspnœa of, in underground workers in coal mines, 101
Electrical accidents, thermal injuries due to, 46
Electrically driven cutting tools, " dead hand " from, 42
Electrocardiogram in silicosis, 44
Electrostatic precipitation of industrial dust, fumes, and vapours for hygienic purposes, 47
———— precipitator, improvement of, 171
Emphysema, surgical, due to compressed air, 46
Environment and fatal heat stroke, 47
———— ———— of tuberculous patients in Lanarkshire, 99
Ethylene imine, acute toxicity to small animals, 219
Eye injury due to sulphur dioxide, 226, 227
—— —— due to quinone vapours, 37, 38

F

Fainting and flying, 168
Fatigue, effect of amphetamine sulphate on, 97
———— ocular, 98
Flight personnel, physiological characteristics of, 222
Floors, oil treatment of, 223
Food and beverages, dangers of cadmium-plated receptacles for, 96
——, disinfecting air in places of manufacture, 103
Foreign bodies, digital, in spot-welders, 46
———— ———— metallic, in brain abscess, 226
Foundry workers, nodulations in, 170
Fruit, control of infected, 102
Fumes, electrostatic precipitation of industrial, 47

G

Gammexane, *Aëdes ægypti* and, 229
———— for malaria control in Sierra Leone, 104
Gas workers, injuries in, 103
Glass-blowers, respiratory function of, 42
Glass fibre, industrial disease due to filaments of, 102
—— industry, silicosis in, 169
Granite quarries, silicosis in workers in 100
Granular basophilia during exposure to lead poisoning, 30

H

Halogenated organic vapours in air, determination of, 39
Headache from contact with dynamite, 36
Heat, clothing for work in tropical, 47
—— creatinine losses in sweat in, 98
—— salt tablets for use in, 97
—— stroke, environment and fatal, 47
High-altitude flight, investigations in, 97
High-tension current accidents with muscle injuries and myoglobinuria, 46
Hydrocarbons, determination in blood, 166

I

Industrial toxicology laboratory, range-finding test in, 217
Influenza, immunization against, 49, 103
Injuries, in gas workers, 103
Insecticides, 47, 48
Isocaloric meals of varying carbohydrate content, work, performance, etc. after, 41

K

Kitchen workers, cardiovascular changes in, 41
Kleinhungen gas works, injuries in, 103

L

Lanarkshire, survey of tuberculosis in, 98, 99
Lead absorption and poisoning, hæmatological changes in, 30
—— arsenate, cryolite as detoxifying agent for, 40
—— content of street dirts in New York, 29
—— determination in atmospheric samples, 29
—— exposure to, 30
—— exposure to, in storage battery manufacture, 166
—— hazard in brass foundries, control of, 29, 220
—— in urine, 220
—— poisoning, anti-pernicious anæmia factor in, 96
—— —— granular basophilia in, 30
—— —— and production of agglutinins in relation to recent knowledge of *S. typhi* antigens, 96
"Lethane" insecticide, fatal poisoning, 40
Lettuce, control of infected, 102
Lewisite, disturbance of function induced by, 33
Lung, asbestosis and cancer of, 100
—— bauxite workers', 170
—— changes associated with manufacture of alumina abrasives, 44
—— nodulation in, in foundry grinders, 170
—— Portland cement dust and, 99
—— retention of quartz dust, 100
—— tissue, microscopic detection of cadmium oxide particles in, 45

M

Machine construction plant, carbon monoxide in, 171
Malaria control by "gammexane," 104
Manganese dioxide as antidote to mercury, 165
m-Dinitrobenzene poisoning, 34
Mercurialism, neurological observations on chronic industrial, 39
Mercury exposures in dry battery manufacture, 220
——, manganese dioxide as antidote to, 165
Methæmoglobinæmia, treatment with ascorbic acid, 96
Methanol poisoning, 218
Methyl alcohol poisoning treated with pectins, 35
—— chloride, toxicity of, 40
Microscopic detection of cadmium oxide particles in, 45
Milkers' hands, physiopathology of, 41
Mill workers, pathology of, 45
Miners' nystagmus, 227, 228
Mono-chloro-mono-bromo-methane, toxicity and narcotic action of, 220
Mosquitoes, D.D.T. for, 48, 104

N

Nephritis in textile workers, 167
New York, lead content of street dirts in, 29
Nickel poisoning, 165, 221
Nitric acid gas poisoning, 39
2-Nitropropane, toxicity of, 95
Nose, penetration of air-borne particulates through the human, 102
Nutritional state and miners' nystagmus, 227

O

Ocular tasks, transfer of decrement in, 98
Onion dehydrating plant, survey of, 36
Oxygen poisoning in man, 97
—— pressures, effects on man of carbon dioxide at various, 222

P

Papilloma of renal pelvis in dye workers, 166
Para-aminobenzoic acid, sunburn-protecting effect of, 226
Pectins, methyl alcohol poisoning treated with, 35
Phosgene poisoning, hæmodynamics in, 35
—— —— studies on experimental, 218
—— pulmonary changes following exposure to, 225
Phosphate and metabolism of working and resting subjects, 223
Pilots, fainting in, 168
Piperonyl butoxide, as insecticide, 48
Pitch, skin cancer from, 37
Plastic chips in control of chromic acid mist, 167
Pneumoconiosis, architectural characteristics of, studied by plastic models, 43
—— —— in coal-workers in Wales, 170
—— —— —— histological basis for reticulation of, 100
Pneumonia, lobar, Portland cement dust and, 99
—— —— in shipyard workers, 42, 43
Pneumonitis, chemical, from beryllium compounds, 35, 99
Poland, carbon disulphide poisoning in rayon staple fibre plants in, 218
Portland cement dust, effect on lungs, 99
Premature labour, influence of profession on, 230
Psychiatric aspect of miners' nystagmus, 228
Pyridine in air, estimation of, 166
Pyridoxine hydrochloride for radiation sickness, 32

Q

Quartz, lung retention of dust, 100
—— silicosis in a quartz mine, 224
Quebec, asbestosis in, 100
Quinone vapours, corneal and conjunctival injuries from, 37, 38

R

Radiation sickness, treatment of, 32
Radioactive emanations, 32
Radium dial painting, 33
Rats, sodium fluoracetate against, 48
Rayon staple fibre plants in Poland, carbon disulphide poisoning in, 218
Respiratory exchange etc. after isocaloric meals of varying carbohydrate content, 41
—— —— function of glass-blowers, 42
Respiratory-tract infections, control in industry, 49
—— —— —— oil treatment of floors and bedding in control of, 223

S

Salmonella typhi antigens, lead poisoning and, 96
Salt tablet for use in hot environments, 97
Scotland, tuberculosis in Lanarkshire, 98, 99
Selenium poisoning, 165
Shallow-water diving, problems of, 41
Shipyard workers, pneumonia in, 42, 43
Sierra Leone, "gammexane" for malaria control in, 104
Silica, conversion of, during ignition, possible source of error in analysis of powdered samples, 43
—— dust, 101, 102
Silicosis, pulmonary vascular lesions in, 169
—— appraising exposure, 101
—— diagnosis of, 169
—— experimental study, 224
—— electrocardiogram in, 44
—— in glass industry, 169
—— hæmatological observations in, 44
—— lesions in workers removed from dust, 224
—— in a quartz mine, 224
—— solubility theory of, 168
—— in workmen in Alzo granite quarries, 100
Silicotic coal miners, hæmatological and humoral changes, 44
Skin cancer from pitch and tar, 37
—— ——, social and occupational factors in ætiology of, 50
Small-pox, vaccination against, 49
Smoke and public health, 171
Social factors, influence on incidence of extrapulmonary tuberculous infection, 99
Sodium fluoracetate against rats, 48
—— nitrate poisoning, 40
Solvent vapours, sensory response to, 35
Spot-welders, digital foreign bodies in, 46
Steel industry, vitamin supplement administered to workers in, 103
Storage battery manufacture, control of lead exposure in, 166
Street dirts in New York, lead content of, 29
Stressful activities, human adrenal cortex and, 222
Sulphur dioxide, eye injury due to, 226, 227
Sunburn-protecting effect of *para*-aminobenzoic acid, 226
Surgical emphysema due to compressed air, 46
Swineherd's disease, observations on, 230

T

Talc mining, dust hazard in tremolite, 101
Tar, skin cancer from, 37
Tellurium, effect of ascorbic acid on tellurium breath, 219
—— —— exposure and treatment with BAL, 35
—— —— toxicity of ingested, 219
Tetraethyl lead, mass poisoning by, 221
Tetranitromethane, toxic effects of, 33
Textile workers, nephritis in, 167
Thermal injuries due to electrical accidents, 46

Thymoxyethyldiethylamine, treatment of phosgene poisoning with, 218
Tobacco industry, health hazards of, 230
Trasentine etc. for radiation sickness, 32
Trichlorethylene in dry cleaning of clothes, hygienic drawbacks of, 40
Tropics, clothing for work in, 47
Tuberculosis, asbestosis, and pulmonary, 100
———— survey in Lanarkshire, 98, 99

U

Ultra-violet irradiation to disinfect air in food-manufacturing premises, 103
Under-nutrition, effect on choline esterase activity of serum, 223

V

Vaccination, influenza, in an industrial plant, 49
———— smallpox, of industrial workers, 49
Vapour, electrostatic precipitation of industrial, 47
——— samples in air, methods of obtaining, 167
Varnishers, industrial pathology in, 38, 96
Vegetables, control of infected, 102
Visual reaction-time as a function of variations in the stimulus-figure, 98
Vitamin B_6 for radiation sickness, 32
——— C for methæmoglobinæmia, 96
——— C content of tissues of experimental animals after benzol poisoning, 95
——— C and tellurium, 219
——— supplement, effect of administering, in the steel industry, 103
Volatile hydrides, 37

W

Wales, pneumoconiosis in coal miners in, 170
Welders, pneumonia in shipyard workers, with special reference to, 42
Work performance etc. after isocaloric meals of low and high carbohydrate content, 41
———— ————, alcohol etc. and, 223
———— ————, phosphate administration and, 223

X

X-rays, professional injury due to, 226

Z

Zinc determination in atmospheric samples, 29
